

## **Enrollment and Outcomes Trends of City of Orange High School Graduates Who Matriculate to Santa Ana and Santiago Canyon Colleges**

**Compiled by the RSCCD Research Department, December 2010**

### **Background**

For about a decade, now, we have tracked new graduates (first-time freshmen 17-19 years of age) from select Santa Ana area high schools who enroll at Santa Ana College. With this publication we expand our study to include matriculants from Orange area high schools at both Santa Ana and Santiago Canyon Colleges. Groups of students—cohorts—are comprised of students who last attended high schools in these cities, ages 17-19, who enrolled for the first-time at SAC or SCC in the fall semesters of 2006 through 2010; select analyses, where appropriate, include cohorts back to Fall 2001.

### **Summary of Findings**

- Course success rates of first-time freshmen cohort students from Orange high have remained somewhat constant at SAC and have increased moderately at SCC.
- While semester-to-semester persistence rates have remained constant over the first three years included in this study, Fall 2009 cohort rates (for both 2<sup>nd</sup> and 3<sup>rd</sup> semester) increased sharply. Future study will determine if this is a true increase, an anomaly, or due to a recent migration to a new data source.
- Matriculants from Orange high schools earned degrees and certificates in 7-8 semesters of study at SCC and in 9-10 semesters at SAC. Most major fields of study were Liberal Arts and General Education Breadth.
- The majority of cohort students who transfer to four-year colleges enroll at California State Universities at Fullerton and Long Beach and University of California at Irvine.
- Matriculants from Orange high schools have placed slightly higher in math and English sequence courses, and a significantly higher proportion of students have demonstrated reading proficiency than in past years.

Detail data is included in this report.
