

Facility Update on Measure E

Facts About Measure E

- \$337 M bond approved by voters in 2002.
- To date, RSCCD has spent half of all Measure E funds on new construction and renovation projects at both campuses.
- The Independent Bond Oversight Committee has given RSCCD the highest possible rating for efficient use of public funds for new construction and renovation projects.
- RSCCD has leveraged State funds, wherever possible, to extend local bond dollars to complete the project list initially constructed in 2001-02, as part of the initial facilities master plans for both Santa Ana College and Santiago Canyon College. State funds have been used to build the new Library at Santiago Canyon College, and will supplement the building of the new science building, breaking ground this fall. State bond funds also paid, in part, for the seismic retrofitting of the Women's & Men's Locker Room at Santa Ana College.

Santa Ana College

Measure E-funded projects – Santa Ana College (SAC)
