BP 6012 Sustainable Practices

Reference(s):
AB 939

The Rancho Santiago Community College District holds sustainability to be a foundational principle in its current and future development. As a responsible steward of natural resources and the environment, the District will endeavor to minimize its impact on the environment by implementing best practices for conserving resources, reducing waste, implementing energy reduction and alternative energy generation strategies, constructing efficient buildings, and by developing partnerships that will further these activities.

The Board of Trustees delegates authority to the Chancellor to establish administrative regulations for sustainable practices in the following areas: environmental education and training, energy, waste management and recycling, resource conservation, facilities, grounds and landscape management, hazardous materials, transportation and air quality, and purchasing practices.
