Re: Confirmation of Santa Ana College Associate Degrees and Certificates for Fall 2017	
Action: Request for Approval	

BACKGROUND

Santa Ana College allows students to file for degree and certificate completion three times per year. Attached are lists comparing degrees and certificates earned for fall 2017. Also attached, please find a list of students who have completed course work at Santa Ana College leading to the Associate Degree and/or Certificate for fall 2017.

ANALYSIS

Santa Ana College awarded 672 Associate Degrees at the conclusion of the fall 2017 semester. Of the total number of degrees awarded, 378 were AA's, 68 AAT's, 141 AS's, 85 AST's, 91 double majors, and 40 with 3 or more majors. The area with the highest number of degrees was in Liberal Arts/Arts, Humanities and Communications with 180 degrees. This is an increase from fall 2016, which had 148 degrees.

Santa Ana College awarded 5055 Certificates of Achievement/Accomplishment at the conclusion of fall 2017, which is a substantial increase from 1155 awarded in the fall of 2016. This significant increase is due to the continued auto-awarding process and some recent state approved certificates. The areas that had the most significant increase were Automotive Technology, Child Development, Fire Technology and International Business.

RANCHO SANTIAGO COMMUNITY COLLEGE DISTRICT
DISTRICT OFFICE - BUSINESS OPERATIONS/FISCAL SERVICES

To:	Board of Trustees	Date: April 23, 2018
Re:	Adoption of Resolution No. 18-07 - Designating Specific Material(s), Product(s), Thing(s), or Service(s) for Use on District Facilities Pursuant to Public Contract Code §3400, Including Bases for Designating Those Items	
Action:	Request for Adoption	

BACKGROUND:

Over the last four years, District Facilities staff through working on various capital facility improvement and new construction projects discovered there are certain equipment, products, and materials that have been in place and utilized uniformly across buildings within the district. Therefore, the District established a working group ("Facility Design Standards Committee") in 2013-2014, to review and assess various items and evaluate whether there is a need to establish design guidelines, including the review of common equipment, products and materials across buildings. The group was formed to address building and design guidelines, and through the years, has included various representatives staff from District Facilities, Campus facility Maintenance and Operations, Administrative Services, Information Technology Services, Safety/Security, consultants and architects. The committee has met several times over the years and continues to meet on an on-going as needed basis.

The District Facilities staff has the responsibility of maintaining the design guidelines and standard documents and updates them accordingly. These documents are made electronically available to all committee members, architects, consultants and/or engineers. The committee meets to continuously re-evaluate equipment, products and/or materials in use and installed across district building facilities to discuss findings, specifications, recommendations and/or any changes to the design guidelines. Based on the Facility Design Standards Committee's recommendations, many projects continue to progress in design and construction and there is a need to formalize these recommendations to designate specific material(s), product(s), thing(s), or service(s) for use on District facilities as outlined in the attached Resolution.

Public Contract Code Section 3400 is designed to encourage contractors and manufacturers to develop and implement new and inventive materials, products, and services that function as well, in all essential respects, as materials, products, and services that are required by a contract, but at a lower cost to taxpayers. This section of the Public Contract Code allows the awarding authority, or its designee, to specify items or products by specific brand or trade name without an "or equal" product for any of the following purposes:

1. In order that a field test or experiment may be made to determine the product's suitability for future use;
2. In order to match other products in use on a particular public improvement either completed or in the course of completion; or
3. In order to obtain a necessary item that is only available from one source; or
4. (A) In order to respond to an emergency declared by a local agency, but only if the declaration is approved by a four-fifths vote of the governing board of the local agency issuing the invitation for bid or request for proposals; or (B) In order to respond to an emergency declared by the state, a state agency, or political subdivision of the state, but only if the facts setting forth the reasons for the finding of the emergency are contained in the public records of the authority issuing the invitation for bid or request for proposals.

(Public Contract Code § 3400 (c).)

ANALYSIS:

The District has relied on bases #1 and #2 above to conclude that the items identified in the Resolution should be listed without an “or equal,” either as a field test for that product or to match other products already in use. Although not required by Section 3400, District staff has included bases to support the Resolution that the specified equipment, products, or materials is required to match existing systems for both compatibility and efficient maintenance or to test a product for current and future use. District staff, including the campuses facilities maintenance & operations departments along with District’s facilities consultants and architects have completed an update of proposed material(s), product(s), thing(s), or service(s) for use on District construction projects. These proposed items have been reviewed by the Facilities Design Standards Committee.

The Resolution has been reviewed by legal counsel, Philip J. Henderson of Orbach Huff Suarez & Henderson LLP.

RECOMMENDATION:

It is recommended that the Board of Trustees adopt Resolution No. 18-07 - Designating Specific Material(s), Product(s), Thing(s), or Service(s) for Use on District Facilities Pursuant to Public Contract Code §3400, Including Bases for Designating Those Items.

RESOLUTION NO. 18-07

WHEREAS, the Board of Trustees of the Rancho Santiago Community College District ("District") is expending funds in multiple public work projects to renovate, repair, modernize and construct new facilities as part of its Capital Improvement Program and other construction projects ("Construction Program") to create suitable educational facilities for all its students and staff throughout the District; and

WHEREAS, the District has a number of specific materials, products, equipment and services in place at its colleges and other District buildings that satisfy the needs of the District and the delivery of its educational programs ("Designated Products"); and

WHEREAS, Public Contract Code ("PCC") § 3400(c)(1) provides that the District may specify Designated Products in its specification for bids or requests for proposals in connection with the construction, alteration, or repair of public works upon a finding by the District's Governing Board that the Designated Products are listed in order that a field test or experiment be made to determine the product's suitability for future use; and

WHEREAS, PCC § 3400(c)(2) provides that the District may specify Designated Products in its specifications for bids or requests for proposals in connection with the construction, alteration, or repair of public works upon a finding by the District's Board that the Designated Products are listed for the purpose of matching other products in use on a particular public improvement either completed or in the course of completion; and

WHEREAS, the District intends to specify in its bids or requests for proposals, Designated Products as the only acceptable material(s), product(s), thing(s), or service(s) for use on Construction Program projects in order to either (1) conduct a field test or experiment may be made to determine the product's suitability for future use per PCC § 3400 (c)(1) ("Field Test") or (2) match other product(s) in use on other District public improvement(s) either completed or in the course of completion per PCC § 3400(c)(2) ("Match Others In Use"); and

WHEREAS, for items that are Match Others In Use items, the District has determined that uniform systems District-wide will facilitate technical familiarity among faculty and staff while reducing training and increasing efficiency in the District; and

WHEREAS, for items that are Field Test items, the District and its consultants have undertaken considerable research into the Designated Products that would properly serve the District's administrative and educational purposes and recommends conducting a field test/experiment on those to determine suitability for future use; and

WHEREAS, the District's intent is to match existing systems currently in use to avoid the cost of designing and engineering systems that may not be compatible with those existing systems; and

WHEREAS, the District desires to design current and future projects utilizing certain products/brands to match items in existing projects so as to establish a District-wide, homogenous system of Designated Products, thus avoiding incompatibility issues, and increased cost benefit of training, and maintenance; and

WHEREAS, the District has established a working group ("Facility Design Standards Committee"), comprised of District and college personnel from various program areas (i.e. facilities, maintenance, administrative services, information technology, and safety) that meet on an on-going/as needed basis to re-evaluate the District's findings and specifications related to the Designated Products. Based on the Facility Design Standards Committee's evaluation of other products, manufacturers, equipment, and systems, the District updates its list of Designated Products accordingly; and

WHEREAS, the District will endeavor to list, whenever feasible, more than one product or system when more than one product or system is acceptable and the above conditions are sufficiently satisfied; and

NOW, THEREFORE, THE BOARD DOES HEREBY MAKE THE FOLLOWING FINDINGS:

Section 1. That the above recitals are all true and correct.

Section 2. That the Designated Products listed in **Exhibit "A"** are the only acceptable material(s), product(s), thing(s), or service(s) for use on projects in the Construction Program, because, as indicated in the listing of that Designated Product, the Designated Products either (1) to conduct a Field Test or (2) Match Others In Use, for the following reasons, as applicable and without limitation:

- a. So that the District can conduct a Field Test to determine the suitability for current and future use;
- b. So that materials, products, equipment and services at the facilities throughout the District are compatible;
- c. So that all of the materials, products, equipment and services are uniform;
- d. So that the maintenance, service, or replacement of equipment, products and materials is made easier through compatibility and uniformity;

- e. So that spare parts and replacements are more easily stocked for uniform building components;
- f. So that vendors and manufacturers can provide suitable upgrades to their products which will continue to meet the needs of the District.

Section 3. That the District staff shall endeavor to ensure that any listed Designated Products includes an “open installer policy” for its systems that will always allow more than one contractor to purchase and install their systems on District projects.

Section 4. That the District staff and construction team shall faithfully review all requests for substitutions and requests for consideration of other, new equipment, products, or materials which may meet the District's criteria and then be added to the list of Designated Products.

Section 5. That the District's Facility Design Standards Committee shall re-evaluate District requirements and Specifications on an ongoing basis and review the products and systems addressed in this Resolution based on issues of compatibility, durability, price, competitiveness, maintenance and other criteria as the Facility Design Standards Committee deems appropriate.

Section 6. That any vendor or manufacturer may submit requests with appropriate backup documentation and information in the future to be considered as a Designated Products. The Facility Design Standards Committee shall evaluate all such requests as established by the Facility Design Standards Committee when it re-evaluates the Designated Products on an ongoing basis.

Section 7. That the District's Facility Design Standards Committee may substitute upgraded Designated Products, as listed in this resolution, as determined to be in the best interest of the District.

Section 8. That the District's Facility Design Standards Committee may substitute an obsolete Designated Product with the manufacturer's superseding product, should a Designated Product in this Resolution become obsolete.

Section 9. That the following **Exhibit “A”** of listed materials, products, equipment and services shall be considered as Designated Products in order to match other products in use on the District's public improvements, either completed or in the course of completion.

FOR DISTRICT CONSTRUCTION

- A. **087100 Medeco** for Keying System, Cylinders (Field Test)
1. Current system (Sargent Keso) doesn't have any additional keyways to offer (maxed out on key configurations).
 2. Locksmith is able to create keyways with this Medeco system.
 3. Highly secured system.
 4. Used as test pilot to determine if system can be made compatible with new access control lockdown system.
- B. **272000 Aruba** for Wireless Access Points (Match Others In Use)
1. The existing wireless infrastructure for all sites/campuses is Aruba.
 - i. Any new areas requiring wireless coverage must use Aruba access points to tie into the existing infrastructure and avoid being a "stand alone" system.
 - ii. Only Aruba access points are compatible and able to operate with the existing wireless infrastructure.
 - iii. Any "stand alone" non-Aruba wireless systems will cause interference, as both systems may try to use the same limited wireless channel space. This will cause network performance degradation.
 2. Aruba devices have the capability of detecting, preventing and correcting wireless interference and other issues from other Aruba devices. This ensures that the system is constantly fine-tuned to operate at optimal levels. This cannot be done with non-Aruba wireless devices.
 3. District personnel are currently trained to maintain and support the Aruba controllers that manage the entire wireless system.
 4. Spare parts are readily available.
 5. The system is highly available and resilient to failure. The main Aruba controllers, located at Santa Ana College and Santiago Canyon College are backups of each other. Either site can sustain the load for the entire district if necessary.
- C. **272000 Brocade** for BDF/IDF Switches (Match Others In Use)
1. The equipment is widely used throughout the District. The core network infrastructure for all sites/campuses is Brocade.
 2. The District has invested heavily on standardizing on Brocade to eliminate the complexity caused by mixing network manufacturers.

3. All network gear has been upgraded to Brocade in the past few years and there are plans to continue to perform several upgrades throughout upcoming Fiscal Years until the system has been fully standardized.
4. District personnel are familiar with the configuration and management of Brocade network gear.

D. **274116 Extron** for Audio Visual (AV) System Control and Switching
<http://www.extron.com/> (Match Others In Use)

1. Non-proprietary and source codes are released/provided
 - a. Crestron existing system does not allow source codes to be released.
2. Compatible with Utelogy
 - a. Utelogy is a software (downloaded on any computer) that allows the user to control all components of the system (projector, computer, document camera, DVD, etc.) in lieu of using a built-in controller.
 - b. Utelogy can be accessed remotely when issues occur and to collect data.
 - c. Utelogy can be upgraded whenever there is a new software release.
3. "One stop shop"
 - a. Offers everything from one manufacturer including switcher, speakers, pole vault, amplification, etc.
4. Locally located (headquartered in Anaheim) and will provide consistent and cost-effective maintenance, operating and repair costs. Technical support is available through the hotline 24 hours a day, 365 days a year.
5. Current availability of spare parts. The manufacturer is located locally and parts can be purchased and installed within a two (2) hour period.
6. District personnel are currently trained to maintain and utilize the system.
7. The system allows network connectivity for web-based monitoring and problem solving via the network, thus reducing the District response time.

E. **275313 Primex** for Wireless Clocks <https://www.primexinc.com/products/> (Match Others In Use)

1. The existing wireless clock system across all sites/campuses is Primex.
2. Existing system requires transmitters to transmit a certain frequency to each clock at the site.
 - i. System requires an FCC license for the channel numbers
 - ii. Addition of (2) 1W transmitters can be added under the current FCC license for Santa Ana College
 - iii. Santa Ana College FCC license is active until 9/29/2025
3. If a new clock system is selected the following would occur:
 - i. There would be two different systems to be maintained by the campus as well as two separate FCC licenses.
 - ii. The clocks on campus may not all synchronize to the same time.

F. **282300 Sony** for Digital Video Surveillance (Match Others In Use)

1. The existing video surveillance system cameras for all sites/campuses is Sony.
2. The configuration/maintenance software will only support Sony.
3. The district relies on motion alerts for video surveillance. Other comparable cameras tested required a lot more steps and were more complex to set up motion alerts.
4. Existing camera mounts will not accommodate non-Sony brand cameras.
5. Spare parts are readily available. The current inventory of replacement parts only supports Sony.
6. District personnel are familiar with the configuration and management of Sony cameras.

G. **283100 Notifier by Honeywell** for Fire Alarm (Match Others In Use)

1. The existing fire alarm system across all sites/campuses is Notifier.
 - i. Any new areas requiring fire alarm coverage must use Notifier to tie into the existing infrastructure and avoid being a “stand alone” system.
 - ii. Only Notifier products are compatible and able to operate with the existing fire alarm system.
2. Service maintenance staff and District Safety personnel are familiar with the specified fire alarm system.
3. The following parts will be Notifier brand: fire alarm control panels; voice communications systems; annunciators; notification alarm devices; power supplies; and any other equipment required for an operational system.
4. Spare parts are readily available.
5. The system is easy to use, program, and repair.

H. **328400 Calsense for Irrigation Controller** (Match Others In Use)

1. The District has been modernizing and upgrading the irrigation system at the Santa Ana College campus. More than sixty percent of the system has been replaced with new modern equipment and components. The newly installed irrigation controllers are manufactured by Calsense. One hundred percent of the irrigation controllers at Santiago Canyon College are Calsense.
2. The District Wi-Fi network supports Calsense controllers
3. District personnel are currently trained to maintain and utilize the system.
4. The system allows network connectivity for web-based monitoring and problem solving via the network, thus reducing the District response time.
5. The Calsense controller easy to use, program, and repair.

Re:	Approval of Agreement with Michael Baker International, Inc. – Topographic Land Survey Consultant Services at the District Operations Center	
Action:	Request for Approval	

BACKGROUND:

This is a new agreement for topographic land survey consultant services at the District Operations Center. The entire site is bounded by Santa Clara Avenue to the south, North Broadway to the west and the Santa Ana Freeway 5 to the east. The site is shared with Veros Credit addressed as 2333 North Broadway located on the northern portion of the site (Parcel #1). Veros Credit recently purchased the 2333 North Broadway building and parcel. The southern portion of the site (Parcel#2) is owned by the Rancho Santiago Community College District. The appearance of the buildings and site maintenance are required to be coordinated and cost shared as a condition of the sale/purchase of the properties. These deed restrictions along with the expansion of the operations at the privately owned Veros Credit have begun to present challenges to on-site parking and procurement of maintenance and operations services. The survey is needed to confirm property boundaries, utility locations, easements and other site topography as the existing survey is insufficient and out dated. The primary objective is to accurately identify and delineate site boundaries particularly with respect to the boundary line between the two parcels. This will assist the District in addressing issues associated with site upkeep, repairs, maintenance, building and site improvements, including future parking reconfiguration if necessary.

ANALYSIS:

A Request for Proposal #1718-202 for land title surveying services at the District Operations Center was solicited to four prequalified firms on March 2, 2018 with a due date of March 21, 2018. The District received four proposals including DMc Engineering (Irvine); Michael Baker International, Inc. (Santa Ana); PENCO Engineering, Inc. (Irvine) and TAIT & Associates, Inc. (Santa Ana). A screening panel convened on March 28, 2018 to review the proposals. The panel recommends Michael Baker International, Inc. by consensus after a thorough review based upon the culmination of their RFP response, experience, team members, reference checks, and approach to the project and hourly rate. It is recommended that the District enter into an agreement with Michael Baker International, Inc. for topographic land survey consultant services at the District Operations Center.

The services covered by this agreement shall commence April 24, 2018 and end December 31, 2018. The contract is an hourly not to exceed fee of \$18,700. The District has reviewed the fee and it is reasonable and within industry standards.

This agreement is funded by Capital Outlay Funds.

RECOMMENDATION:

It is recommended that the Board of Trustees approve the agreement with Michael Baker International, Inc. for topographic land survey consultant services at the District Operations Center.

Re:	Approval of Amendment to Agreement with Facilities Planning & Program Services, Inc. - Planning and Project Management Services		
Action:	Request for Approval		

BACKGROUND:

This is an amendment to an existing agreement for additional planning and project management services and an option to extend contract on an annual basis for three additional years. On July 17, 2017, the Board of Trustees approved an agreement with Facilities Planning & Program Services, Inc. (FPPS) for planning and project management services. A new Request for Qualifications (RFQ) was advertised last year to replace and refresh the prior prequalified consultant list. The RFQ outlined the scope of work and activities that staff needs assistance on for the upcoming year and includes the following: project planning, design management, assistance with bidding and procurement, and managing a wide range of capital facility improvement projects. The department currently has over 100 active projects in progress due to an increase in capital improvement projects, scheduled maintenance, accessibility projects for barrier removal, relocations and an increase in campus requested facility modification requests received in this fiscal year.

The amendment is needed to cover additional consultant services for the upcoming fiscal year due to an increase in relocation/move and new project requests. Additionally, Santa Ana College is in need of undertaking an operations review of the custodial services and has requested further planning assistance from FPPS. The consultant will assist the college to review building square footage, schedules, provide feedback based on observations and make recommendations. To see the original agreement, please [click here](#).

ANALYSIS:

The amendment is to increase the contract by \$285,000 for year 2 and includes an option to renew contract duration on an annual basis for an additional three year maximum. The amendment increase is to cover additional consultant planning and project management services needed through 2019. The current proposed revised total contract amount for years 1 and 2 is \$1,180,490 and includes reimbursable expenses through June 30, 2019.

The District will have the ability to renew the contract on an annual basis for up to three years maximum at an estimated not to exceed amount of \$549,600 per year and rates for staffing are fixed for the five year period and FPPS has agreed to retain 2017 hourly rates without an

increase. The contract duration could be up to five years maximum beginning on August 1, 2017 and through June 30, 2022 to maintain current rates if on an annual basis the District elects to renew such contract based on project need and workload assignments. The District has reviewed the fee and it is reasonable and within industry standards.

The total five year breakdown is estimated as follows:

Year 1 + Year 2:	\$895,490	
Amendment #1	\$285,000	
Year 3:	\$549,600	optional to renew based on need
Year 4:	\$549,600	optional to renew based on need
Year 5:	<u>\$549,600</u>	optional to renew based on need
Total Not to Exceed:	\$2,829,290	

This agreement is funded by Capital Outlay Funds.

Re:	Approval of Agreement with Sandy Pringle Associates Inspection Consultants – Project Inspector Services for Hammond Hall Window Replacement Project at Santa Ana College	
Action:	Request for Approval	

BACKGROUND:

This is a new agreement for project inspector services for Hammond Hall window replacement project at Santa Ana College. Building H (Hammond Hall) was built in 1954 and the windows have never been replaced. This is a State Scheduled Maintenance project to replace all windows which will be more energy efficient for the building. The Division of the State Architect (DSA) requires that all construction projects are overseen by a DSA certified project inspector to ensure the project is constructed in accordance with the DSA approved plans and specifications.

ANALYSIS:

A Request for Proposal #1718-201 for project inspector services for the Hammond Hall window replacement project at Santa Ana College was solicited to six prequalified firms on March 2, 2018 with a due date of March 21, 2018. The District received three responses from BPI Inspection Services (Los Angeles), Martin Brothers Construction Services (Costa Mesa), and Sandy Pringle Associates Inspection Consultants (Torrance). A screening panel convened on March 22, 2018 to review the proposals. The panel interviewed Sandy Pringle Associates Inspection Consultants on March 26, 2018 and BPI Inspection Services on March 28, 2018. The panel recommends Sandy Pringle Associates Inspection Consultants by consensus after a thorough review based upon the culmination of their RFP response, experience, team members, reference checks, approach to the project, hourly rate, and interview performance. The selection was also based on consideration of the construction schedule, familiarity with the scope of work, familiarity with the campus, and type of inspection needed for the project. It is recommended that the District enter into an agreement with Sandy Pringle Associates Inspection Consultants for project inspector services for Hammond Hall window replacement project at Santa Ana College.

The services covered by this agreement shall commence April 24, 2018 and end December 31, 2018. The contract is an hourly not to exceed fee of \$29,400. The District has reviewed the fee and it is reasonable and within industry standards.

This agreement is funded by Capital Outlay and State Scheduled Maintenance Funds.

RECOMMENDATION:

It is recommended that the Board of Trustees approve the agreement with Sandy Pringle Associates Inspection Consultants for Project Inspector Services for Hammond Hall Window Replacement Project at Santa Ana College as presented.

Re:	Approval of Amendment to Agreement with MTGL, Inc. – Geotechnical Testing and Inspection Consulting Services for the Science Center at Santa Ana College	
Action:	Request for Approval	

BACKGROUND:

This is an amendment to an existing agreement for additional geotechnical testing and inspection services. On December 4, 2017, the Board of Trustees approved an agreement with MTGL, Inc. for geotechnical testing and inspection consulting services for the construction of the Science Center at Santa Ana College. To see the original agreement, please [click here](#).

Additional services are required for testing of import fill materials and export of soils from the site as the original scope of work for the contract did not account for this additional testing activity and needs to be adjusted. The project structural engineer may also require additional pile integrity testing to ensure all piles fully meet the requirements of the construction documents which is a new request. These services will be performed on an as-needed basis upon notice from the District that a testing service(s) is required for the project during these construction activities.

ANALYSIS:

The amendment is to increase the contract by \$65,000. The revised total contract amount is \$158,511. The District has reviewed the fee and it is reasonable and within industry standards.

This project is funded by Measure Q Funds.

Re:	Ratification of Award of Bid #1343 – SM16 Water Conservation Irrigation Controller Upgrade Phase 1 at Santa Ana College	
Action:	Request for Ratification	

BACKGROUND:

This is a ratification for the award of Bid #1343 for SM16 Water Conservation Irrigation Controller Upgrade Phase 1 at Santa Ana College. As part of the District's water conservation efforts and Scheduled Maintenance projects, six existing site irrigation controllers at Santa Ana College will be upgraded to reduce water consumption. This is the first phase of work based on availability of funding. The District assessed the existing control system at Santa Ana College to determine the viability of upgrading to new technologies that allow auto water flow adjustments based on weather. It was determined the existing system is inefficient, does not correct flow based on pipe breaks, leaks, or rainfall, the existing system consists of a mix of different manufacturers with incompatible technologies, does not accurately report water demand, and requires manual intervention to operate.

Based on the findings, it was determined the system is in need of an upgrade. The proposed Phase 1 upgrade will include a replacement of six irrigation flow meters, flow valves and integration into a new control system. The system will provide reporting features allowing the college and District to report water usage. This level of reporting and control will allow the college staff to more effectively manage irrigation and monitor water consumption.

ANALYSIS:

In accordance with the California Uniform Public Construction Cost Accounting Act (CUPCCAA), Bid #1343 for SM16 Water Conservation Irrigation Controller Upgrade Phase 1 at Santa Ana College was advertised on March 9, 2018, and a Notice of Inviting Bids was sent to 12 contractors from the District's qualified contractors list on March 9, 2018.

A mandatory job walk was conducted on March 14, 2018 and there were two attendees. Bids were opened on March 27, 2018, as noted on the attached bid result form. The District received one bid for the project. Aramexx Group, Incorporated dba Aramexx Construction (Claremont) submitted the lowest responsive bid in the amount of \$126,200. District staff has completed a due diligence review of contract documents to ensure compliance with license and bid bond requirements. After review of the bid received, the District recommends approval of award of Bid #1343 to Aramexx Group, Incorporated dba Aramexx Construction. This is the second bid

undertaken by the District for this project due to low bidder interest. It is recommended to move forward with the award of bid to not cause further delay.

The Vice Chancellor of Business Operations/Fiscal Services has authorized the award of the contract, under the authority of CUPCCAA to Aramexx Group, Incorporated dba Aramexx Construction. The anticipated start date is April 30, 2018. The estimated construction duration is 40 days.

The project is funded by Capital Outlay and State Scheduled Maintenance Funds.

RECOMMENDATION:

It is recommended that the Board of Trustees ratify the award of Bid #1343 - SM16 Water Conservation Irrigation Controller Upgrade Phase 1 at Santa Ana College as presented.

Re:	Approval of Subscription for Blackboard Learn Archive with Blackboard Inc.		
Action:	Request for Approval		

BACKGROUND

On January 9, 2017, the Board of Trustees approved the Instructure agreement for Canvas Learning Management System (LMS) for online learning environment for distance education. The District started the implementation in June 2017 and is using Canvas with a small group of instructors, but still currently utilize a hosted version of Blackboard ILP for most courses. By summer of 2018, the District is required to fully transition to Canvas and retire Blackboard completely per our Canvas agreements for both SAC and SCC. It has been determined that we need access to our LMS data for a minimum of one year after our Blackboard system is retired. Since we currently have a hosted Blackboard system, we will need to enter into a new agreement in order to retain access to our student data.

ANALYSIS

Our current Blackboard database is 3.3 terabytes. We plan to reduce the size to under 2 terabytes in order to keep the cost down. The archived instance is limited to 10 concurrent users accessing it at any one-time, which will meet our needs for archival. Blackboard Inc. can provide us with course backups, however, in order to use these backups, requires a Blackboard instance. Also, the course backups would be beneficial to use for the courses we elect to delete in order to reduce the terabyte size.

The District would like to enter into an agreement with Blackboard Inc. for the Blackboard Learn Archive for a cost of \$33,000 for the first year. This agreement has an option to renew for an additional two one-year terms with no annual increase. We will determine the need to continue the contract beyond the first year based on the initial archive utilization.

This project will be funded by the ITS operational budget by the savings received from retiring and ending the Blackboard agreement.

RECOMMENDATION

It is recommended that the Board of Trustees approve the subscription for Blackboard Learn Archive with Blackboard Inc. as presented.

Re:	Approval of Contract with Class Leasing LLC	
Action:	Request for Approval	

BACKGROUND

The Campus Safety/Security department at Santiago Canyon College temporarily resides in the U portables on the northeast side of the campus. This location is not conducive to our students and staff. In order to safely serve and protect the college and to provide a secure educational environment, the department requires an operations center that is more centrally located on the campus with higher visibility. Campus Safety/Security also needs additional space to accommodate staff, dispatch operations, an emergency operations, burden-cart chargers, locker rooms, restrooms and secure storage space for weapons and other equipment. The purchase of a new portable building would allow the District to meet both departmental and campus needs.

ANALYSIS

On February 26, 2018 the Board of Trustees approved the Centralia School District contract #N15-2017/2018, issued to Silver Creek Industries, Inc., for the purchase and installation of DSA approved portable buildings, accessories and related installation supplies by the piggyback method for \$780,000. Shortly after the approval of the Silver Creek Industries, Inc. contract the Facility Planning department, through their due diligence process, located another modular vendor who will provide identical portable buildings at a savings of approximately \$145,000. After reviewing product-line availability, technical specifications, performance requirements, portables options and general conditions, the staff has recommended selecting Class Leasing LLC for the purchase and installation of the required portable offices, accessories and related installation supplies through the piggyback method utilizing the Chawanakee Unified School District contract.

In February 2018, the Chawanakee Unified School District awarded Project #11 to Class Leasing LLC for the purchase, lease, relocation dismantle and removal of portable buildings. This is a cooperative contract, competitively bid and meets the legal requirements to utilize the piggyback method set forth in Public Contract Code Section #20652. Class Leasing LLC's contract pricing structure is based on portables size, restroom options, structural requirements and additive alternates. The contract term between the Chawanakee Unified School District and Class Leasing LLC is one initial three (3) year award, and may be extended for an additional one (1) year period in accordance with provisions contained in the Education Code.

This project is to be funded by Capital Outlay funds.

RECOMMENDATION

It is recommended that the Board of Trustees approve the Chawanakee Unified School District contract Project #11, issued to Class Leasing LLC, for the purchase and installation of DSA approved portable buildings, accessories and related installation supplies as presented.

Re:	Approval of Sub-Agreement between RSCCD and San Diego Community College District/San Diego Miramar College for the Industry Sector Projects in Common (ISPIC) - Biotechnology Supply Chain Multi-Regional Project funded by the Career Technical Education (CTE) Data Unlocked Initiative	
Action:	Request for Approval	

BACKGROUND

Rancho Santiago Community College District (RSCCD) was selected to serve as the Fiscal Agent for the California Community Colleges Chancellor's Office's Career Technical Education (CTE) Data Unlocked Initiative to support CTE program development and improvement efforts by providing a suite of tools, training, technical assistance and outcome and labor market data for the California community colleges. As the Fiscal Agent, RSCCD will develop sub-agreements with CTE Data Unlocked Initiative implementation partners.

ANALYSIS

The California Community Colleges Chancellor's Office has directed each statewide Sector Navigators to develop Industry Sector Projects in Common (ISPIC) with college partners, who will commit matching investments of Strong Workforce Program funds to implement projects featuring industry validated best practices, content, and/or models. A sub-agreement has been developed for San Diego Miramar College, as it is one of the participating colleges in the approved ISPIC project: the Biotechnology Supply Chain Multi-Regional Projects in Common.

WHAT NEEDS MOTIVATE THIS PROJECT AND HOW WILL THE PROJECT ADDRESS THESE NEEDS?

Employers have identified quality and regulatory positions as hard to fill throughout the state. Life sciences/biotechnology industries that are regulated by the FDA include food, drugs, medical devices, diagnostics, biologic, and nutritional supplements. The FDA regulates more than \$1 trillion of consumer goods or about 25% of consumer expenditures in the United States. This includes \$466 billion in food sales, \$275 billion in drugs, \$60 billion in cosmetics, and \$18 billion in vitamin supplements.¹ The California Biomedical 2015 Industry Report produced by the California Health Institute (CHI) included a letter from California Governor Jerry Brown stating that, "California leads the nation in the biomedical industry, supporting highly skilled and well-paying jobs in communities across the state.... Last year, California enacted several laws to strengthen our life sciences community and maintain our competitive position, including AB 93 and SB 90, which made targeted investments in the sector... The State of California is committed to supporting innovation and fostering the biomedical industry. I look forward to continuing to work with leaders from companies and research institutions throughout the state to find solutions that advance new medical technologies, strengthen our economy and contribute to a healthier society." Data in the 2015 CHI Industry Report supports Governor Brown's statements and commitment to the growing biomedical industry: • \$101 billion in total revenues • \$27.4 billion in total wages • \$3.8 billion in venture capital investment In 2013 California's biomedical industry employed more than 270,000 people, with an average salary of \$101,540. California's biomedical exports in 2013 increased to \$22.2 billion from \$20.9 billion in 2012. The economic impact of the life sciences goes far beyond the companies that develop drugs, devices and diagnostics. Hundreds of thousands more Californians such as those working in real estate or as patent agents, support the sector. As a result, the Life Sciences Sector is a key factor in sustaining economic growth and manufacturing throughout California. Workforce Gap: Regulatory and Quality Assurance/Control Professionals The Life Sciences Industry/Biotechnology Subsectors share a common need: to comply with FDA regulations. These regulations are a set of quality procedures, called collectively GxPs: Good Manufacturing Practices, Good Laboratory Practices, Good Clinical Practices, and Good Documentation Practices. GxPs are the essence of quality systems and regulatory practices that are essential to the economic health of the industry. Without a trained core workforce, companies cannot thrive in California. Regulatory/quality affairs professionals have the GxP skills and knowledge to help companies comply with FDA regulations and those of other accrediting bodies (e.g., International Organization for Standardization-ISO). Failure to adequately comply with the complex regulatory and quality standards results in costly recalls and consent decrees that will collapse the infrastructure of a company, not to mention the impact on human health and safety. Managing and ensuring quality is crucial for business integrity. Employees who address quality control (product based) or quality assurance (process based) reduce risk, save costly replacement of goods, and maintain customer satisfaction. Regulatory/quality affairs professionals come from diverse backgrounds. Although most have earned a Bachelor's Degree in a STEM field, they were not prepared for these jobs in their degree programs. Most earned their positions through years of internal on the job training opportunities. According to Rx Research Services Inc., "Companies turn to recruiters for hard to fill quality and regulatory positions. They are looking for a mix of on the job experience and a body of regulatory knowledge which is missing in most recent grads. Companies do this because they do not want to risk the fate of their company to an inexperienced team." As a result, this workforce is extremely hard to find; companies often hire by recruiting or 'stealing' employees from each other. Adding to this workforce gap is an evolving regulatory landscape as new technologies come online. For example, in 2011, the federal government enacted into law the Food Safety Modernization Act (FSMA). The FDA began enforcement of FSMA on Oct. 1, 2015 causing food and nutraceutical/vitamin companies to scramble to build a quality regulatory workforce. As life sciences/biotechnology innovative products evolve, so will the ever expanding regulatory landscape. The Training Gap: Why It Exists and How It Will Be Addressed The Life Sciences Sector is experiencing what recruiters call Structural Unemployment, which happens when the skills possessed by the unemployed or underemployed worker do not match the requirements of the job postings. In spite of the clamor for STEM professionals, a close look by the US Census Bureau², finds that many individuals with STEM degrees are not currently employed in their field of study. In fact, many have trouble finding entry level work. Shockingly, only 14% of bachelor's degree holders in the biological sciences are working in their field of study. Typically two-year and four-year colleges do not introduce the idea of quality/regulatory careers and have no curriculum or work experience programs to fill this gap. The reason so many individuals with a STEM background are lacking quality and regulatory knowledge and skills is because most STEM programs are taught from a research perspective, which demonstrates proof of concept, rather than a quality and regulatory perspective, which demonstrates compliance. Most instructors have been trained in a research environment and have never worked in an industry setting or been exposed to quality and regulatory, so they do not think in those terms, and do not teach quality and regulatory to their students. Supply Chain Multi-Region Projects in Common addresses this gap in several ways by offering:

- Regulatory training for instructors.
- Opportunities for instructors to do industry externships – experiences in companies where instructors learn about regulatory within the job settings where their students will be working.
- Curriculum development support to allow instructors to create new regulatory courses or add regulatory modules to existing courses.
- Workshops and curriculum that instructors can use as a recruiting tool to introduce college and high school students to biotechnology.
- Opportunities for instructors to design and/or implement courses, modules, or workshops in which the students apply industry-relevant biotech lab skills under regulatory conditions to produce products such as plates, reagents, or slides that will be used by students in other college or high school classes (supply chain). The Supply Chain Multi-Region Projects in Common is designed to help instructors teach the high-demand industry skills (quality and regulatory) to their students that will help their students get jobs in their field of study and at the same time address the employment gap. 1 Gardiner Harris (November 2, 2008). Investment Plan

The Supply Chain Multi-Regional Project invests in colleges by helping faculty sustainably embed curriculum into their Biotechnology programs that will provide students with high-demand entry-level skills that align with employer need, specifically Quality and Regulatory skills needed to manufacture products. This project leverages best practices used at Skyline College, Ohlone College, Laney College, and San Diego Miramar College, as well as other colleges that have applied Strong Workforce funds to teach quality and regulatory skills. Best practices will be scaled up in programs at colleges throughout the state. The funds will provide support to colleges for professional development, including faculty training and industry externships, curriculum development, and course development. Since most science faculty are educated in a research environment rather than a quality/regulatory environment, it's often difficult for those faculty to effectively teach the detail-oriented quality/regulatory skills to their students, and those activities are often skipped. By participating in quality/regulatory training and also having the opportunity to become CQIA certified, faculty will embed quality/regulatory into their curriculum. Several colleges have requested that most or all of their Biotechnology faculty are CQIA-trained, which will expose their students to quality/regulatory in more Biotechnology classes and reinforce those skills. Since most faculty have not worked in an industry setting, industry externships provide faculty with a unique opportunity to learn exactly what's expected of the students they are training. The experience helps faculty build those expectations into their curriculum so that their students are better prepared. The funds will also provide support that enables students to do supply chain activities, those activities in which the students manufacture products such as reagents and plates under quality/regulatory guidelines that are in turn used in other Biotechnology and Biology labs. Those products also get distributed to local high schools where they are used in Biotechnology labs by hundreds of high school students at huge cost-savings to the high schools in addition to exposing high school students to Biotechnology opportunities at the local Community Colleges. This project is expected to improve enrollment, completion of certificates, and employment in a job closely related to their field of study. The high industry demand for entry-level employees with quality/regulatory skills means that more students will enroll in and complete Biotech programs that will qualify them for good-paying industry jobs.

Task Force Recommendations**Career Pathway**

3. Develop and broadly publicize industry-informed career pathways that prepare students for jobs needed within the regional labor market.

Workplan**Risks**

The biggest risk that might prevent the successful completion of this project is that once the funds are sent to the colleges, there is no mechanism in place for accountability. Eligibility for a potential second round of ISPIC funding could be used for accountability in this first year of ISPIC funding.

ACTIVITY TIMEFRAME: Year 1

MAJOR ACTIVITIES: Activities include instructor training in CQIA and GMP with certification in CQIA, curriculum development to embed in existing courses or for stand alone courses, industry externships, and implementation of supply chain operations in which students manufacture reagents, supplies, and kits under quality and regulatory conditions that will in turn get used by hundreds of students in college biology labs and high school biotechnology labs.

MAJOR OUTCOMES: Quality/regulatory supply chain curriculum will sustainably become embedded in nearly every Biotech program throughout the state, resulting in the following outcomes: increased enrollment in Biotech programs; increased completion of certificates; increased number of students trained with quality/regulatory skills that are in high demand for entry-level biomanufacturing jobs.

Year 2 of the Strong Workforce Program**

INDUSTRY SECTOR PROJECTS IN COMMON (ISPIC)

The CCCCCO Workforce and Economic Development Division is making match funds available to encourage you to invest Strong Workforce dollars* in projects that adopt or adopt/adapt Industry Sector Projects-in-Common (ISPIC). ISPIC projects make it easier for colleges (or regional consortia of colleges) to deliver 'more and better career education' in areas of labor market demand. This suggests the sub-recommendations of the Strong Workforce Task Force, "Develop and broadly publicize industry-informed career pathways that prepare students for jobs needed within the regional labor market".

Our [network of Sector Navigators](#) will administer the rollout of these match funds, with support from their Deputy Sector Navigators. Faculty and colleges are encouraged to contact the pertinent Sector Navigator to learn more.

Each Sector Navigator will have up to \$400,000 in matching funds to deploy and drive workforce outcomes found in LaunchBoard.

**Other funding sources are eligible for the match, such as Adult Education Block Grant funds.*

HOW DO I SEEK OUT THE MATCH?

EXHIBIT B

Begin by reviewing our [ISPIC Index](#) for curated opportunities that you may wish to explore in order to drive student outcomes listed in your LaunchBoard. The ISPIC Index projects have been identified by Sector Navigators (SN) and Deputy Sector Navigators (DSN).

Next, reach out to the pertinent [Sector Navigator](#) to express your interest in adopting or adopting/adapting projects, to better understand how the process will roll out, and to know how commitments of matches can be obtained. Sector Navigators were provided with [guidance on Industry Sector Projects in Common](#) on October 19, 2017.

Concurrently, build support by your college's CIO and Career Education (CTE) Dean to pledge Local Shares of your college's Strong Workforce dollars against the project. Regional Share can also be used.

Re:	Approval of Sub-Agreement between RSCCD and Santa Clarita Community College District/College of the Canyons for the Industry Sector Projects in Common (ISPIC) - ICT/Digital Media Faculty Development Conference Support Project funded by the Career Technical Education (CTE) Data Unlocked Initiative	
Action:	Request for Approval	

BACKGROUND

Rancho Santiago Community College District (RSCCD) was selected to serve as the Fiscal Agent for the California Community Colleges Chancellor's Office's Career Technical Education (CTE) Data Unlocked Initiative to support CTE program development and improvement efforts by providing a suite of tools, training, technical assistance and outcome and labor market data for the California community colleges. As the Fiscal Agent, RSCCD will develop sub-agreements with CTE Data Unlocked Initiative implementation partners.

ANALYSIS

The California Community Colleges Chancellor's Office has directed each statewide Sector Navigators to develop Industry Sector Projects in Common (ISPIC) with college partners, who will commit matching investments of Strong Workforce Program funds to implement projects featuring industry validated best practices, content, and/or models. A sub-agreement has been developed for College of the Canyons, as it is one of the participating colleges in the approved ISPIC project: the ICT/Digital Media Faculty Development Conference Support Projects in Common.

Year 2 of the Strong Workforce Program**

INDUSTRY SECTOR PROJECTS IN COMMON (ISPIC)

The CCCCCO Workforce and Economic Development Division is making match funds available to encourage you to invest Strong Workforce dollars* in projects that adopt or adopt/adapt Industry Sector Projects-in-Common (ISPIC). ISPIC projects make it easier for colleges (or regional consortia of colleges) to deliver 'more and better career education' in areas of labor market demand. This suggests the sub-recommendations of the Strong Workforce Task Force, "Develop and broadly publicize industry-informed career pathways that prepare students for jobs needed within the regional labor market".

Our [network of Sector Navigators](#) will administer the rollout of these match funds, with support from their Deputy Sector Navigators. Faculty and colleges are encouraged to contact the pertinent Sector Navigator to learn more.

Each Sector Navigator will have up to \$400,000 in matching funds to deploy and drive workforce outcomes found in LaunchBoard.

**Other funding sources are eligible for the match, such as Adult Education Block Grant funds.*

HOW DO I SEEK OUT THE MATCH?

EXHIBIT B

Begin by reviewing our [ISPIC Index](#) for curated opportunities that you may wish to explore in order to drive student outcomes listed in your LaunchBoard. The ISPIC Index projects have been identified by Sector Navigators (SN) and Deputy Sector Navigators (DSN).

Next, reach out to the pertinent [Sector Navigator](#) to express your interest in adopting or adopting/adapting projects, to better understand how the process will roll out, and to know how commitments of matches can be obtained. Sector Navigators were provided with [guidance on Industry Sector Projects in Common](#) on October 19, 2017.

Concurrently, build support by your college's CIO and Career Education (CTE) Dean to pledge Local Shares of your college's Strong Workforce dollars against the project. Regional Share can also be used.

To:	Board of Trustees	Date: April 23, 2018
Re:	Approval of First Amendment to Sub-Agreement between RSCCD and San Diego Community College District on behalf of the Sector Navigator for Biotechnology hosted by San Diego Miramar College for the Industry Sector Projects in Common (ISPIC) - Biotechnology Supply Chain Multi-Regional Project funded by the Career Technical Education (CTE) Data Unlocked Initiative	
Action:	Request for Approval	

BACKGROUND

Rancho Santiago Community College District (RSCCD) was selected to serve as the Fiscal Agent for the California Community Colleges Chancellor's Office's Career Technical Education (CTE) Data Unlocked Initiative to support CTE program development and improvement efforts by providing a suite of tools, training, technical assistance and outcome and labor market data for the California community colleges. As the Fiscal Agent, RSCCD will develop sub-agreements with CTE Data Unlocked Initiative implementation partners.

ANALYSIS

The California Community Colleges Chancellor's Office directed each of the ten, statewide Sector Navigators to develop Industry Sector Projects in Common (ISPIC) with college partners, who will commit matching investments of Strong Workforce Program funds to implement projects featuring industry validated best practices, content, and/or models. The Sector Navigator for Biotechnology is hosted by San Diego Miramar College, and San Diego Miramar College is one of the participating colleges in the approved ISPIC project: the Biotechnology Supply Chain Multi-Regional Projects in Common. One sub-agreement (DO-17-2220-164) for \$105,000 was submitted for board approval on March 26, 2018. However, that sub-agreement combined the Sector Navigator's work for the project (\$80,000) with the college's work for the project (\$25,000). Consequently, a first amendment has been developed to revise the sub-agreement to reflect only the work of the Sector Navigator. Another sub-agreement has been developed (DO-17-2220-174) for San Diego Miramar College's work on the project.

Project Director: Sarah Santoyo **Project Administrator:** Enrique Perez

RECOMMENDATION

It is recommended that the Board approve this amendment to the sub-agreement and that the Vice Chancellor, Business Operations/Fiscal Services or his designee be authorized to sign and enter into a related contractual agreement on behalf of the district.

WHAT NEEDS MOTIVATE THIS PROJECT AND HOW WILL THE PROJECT ADDRESS THESE NEEDS?

Employers have identified quality and regulatory positions as hard to fill throughout the state. Life sciences/biotechnology industries that are regulated by the FDA include food, drugs, medical devices, diagnostics, biologic, and nutritional supplements. The FDA regulates more than \$1 trillion of consumer goods or about 25% of consumer expenditures in the United States. This includes \$466 billion in food sales, \$275 billion in drugs, \$60 billion in cosmetics, and \$18 billion in vitamin supplements.¹ The California Biomedical 2015 Industry Report produced by the California Health Institute (CHI) included a letter from California Governor Jerry Brown stating that, "California leads the nation in the biomedical industry, supporting highly skilled and well-paying jobs in communities across the state.... Last year, California enacted several laws to strengthen our life sciences community and maintain our competitive position, including AB 93 and SB 90, which made targeted investments in the sector... The State of California is committed to supporting innovation and fostering the biomedical industry. I look forward to continuing to work with leaders from companies and research institutions throughout the state to find solutions that advance new medical technologies, strengthen our economy and contribute to a healthier society." Data in the 2015 CHI Industry Report supports Governor Brown's statements and commitment to the growing biomedical industry: • \$101 billion in total revenues • \$27.4 billion in total wages • \$3.8 billion in venture capital investment In 2013 California's biomedical industry employed more than 270,000 people, with an average salary of \$101,540. California's biomedical exports in 2013 increased to \$22.2 billion from \$20.9 billion in 2012. The economic impact of the life sciences goes far beyond the companies that develop drugs, devices and diagnostics. Hundreds of thousands more Californians such as those working in real estate or as patent agents, support the sector. As a result, the Life Sciences Sector is a key factor in sustaining economic growth and manufacturing throughout California. Workforce Gap: Regulatory and Quality Assurance/Control Professionals The Life Sciences Industry/Biotechnology Subsectors share a common need: to comply with FDA regulations. These regulations are a set of quality procedures, called collectively GxPs: Good Manufacturing Practices, Good Laboratory Practices, Good Clinical Practices, and Good Documentation Practices. GxPs are the essence of quality systems and regulatory practices that are essential to the economic health of the industry. Without a trained core workforce, companies cannot thrive in California. Regulatory/quality affairs professionals have the GxP skills and knowledge to help companies comply with FDA regulations and those of other accrediting bodies (e.g., International Organization for Standardization-ISO). Failure to adequately comply with the complex regulatory and quality standards results in costly recalls and consent decrees that will collapse the infrastructure of a company, not to mention the impact on human health and safety. Managing and ensuring quality is crucial for business integrity. Employees who address quality control (product based) or quality assurance (process based) reduce risk, save costly replacement of goods, and maintain customer satisfaction. Regulatory/quality affairs professionals come from diverse backgrounds. Although most have earned a Bachelor's Degree in a STEM field, they were not prepared for these jobs in their degree programs. Most earned their positions through years of internal on the job training opportunities. According to Rx Research Services Inc., "Companies turn to recruiters for hard to fill quality and regulatory positions. They are looking for a mix of on the job experience and a body of regulatory knowledge which is missing in most recent grads. Companies do this because they do not want to risk the fate of their company to an inexperienced team." As a result, this workforce is extremely hard to find; companies often hire by recruiting or 'stealing' employees from each other. Adding to this workforce gap is an evolving regulatory landscape as new technologies come online. For example, in 2011, the federal government enacted into law the Food Safety Modernization Act (FSMA). The FDA began enforcement of FSMA on Oct. 1, 2015 causing food and nutraceutical/vitamin companies to scramble to build a quality regulatory workforce. As life sciences/biotechnology innovative products evolve, so will the ever expanding regulatory landscape. The Training Gap: Why It Exists and How It Will Be Addressed The Life Sciences Sector is experiencing what recruiters call Structural Unemployment, which happens when the skills possessed by the unemployed or underemployed worker do not match the requirements of the job postings. In spite of the clamor for STEM professionals, a close look by the US Census Bureau², finds that many individuals with STEM degrees are not currently employed in their field of study. In fact, many have trouble finding entry level work. Shockingly, only 14% of bachelor's degree holders in the biological sciences are working in their field of study. Typically two-year and four-year colleges do not introduce the idea of quality/regulatory careers and have no curriculum or work experience programs to fill this gap. The reason so many individuals with a STEM background are lacking quality and regulatory knowledge and skills is because most STEM programs are taught from a research perspective, which demonstrates proof of concept, rather than a quality and regulatory perspective, which demonstrates compliance. Most instructors have been trained in a research environment and have never worked in an industry setting or been exposed to quality and regulatory, so they do not think in those terms, and do not teach quality and regulatory to their students. Supply Chain Multi-Region Projects in Common addresses this gap in several ways by offering:

- Regulatory training for instructors.
- Opportunities for instructors to do industry externships – experiences in companies where instructors learn about regulatory within the job settings where their students will be working.
- Curriculum development support to allow instructors to create new regulatory courses or add regulatory modules to existing courses.
- Workshops and curriculum that instructors can use as a recruiting tool to introduce college and high school students to biotechnology.
- Opportunities for instructors to design and/or implement courses, modules, or workshops in which the students apply industry-relevant biotech lab skills under regulatory conditions to produce products such as plates, reagents, or slides that will be used by students in other college or high school classes (supply chain). The Supply Chain Multi-Region Projects in Common is designed to help instructors teach the high-demand industry skills (quality and regulatory) to their students that will help their students get jobs in their field of study and at the same time address the employment gap. 1 Gardiner Harris (November 2, 2008). Investment Plan

The Supply Chain Multi-Regional Project invests in colleges by helping faculty sustainably embed curriculum into their Biotechnology programs that will provide students with high-demand entry-level skills that align with employer need, specifically Quality and Regulatory skills needed to manufacture products. This project leverages best practices used at Skyline College, Ohlone College, Laney College, and San Diego Miramar College, as well as other colleges that have applied Strong Workforce funds to teach quality and regulatory skills. Best practices will be scaled up in programs at colleges throughout the state. The funds will provide support to colleges for professional development, including faculty training and industry externships, curriculum development, and course development. Since most science faculty are educated in a research environment rather than a quality/regulatory environment, it's often difficult for those faculty to effectively teach the detail-oriented quality/regulatory skills to their students, and those activities are often skipped. By participating in quality/regulatory training and also having the opportunity to become CQIA certified, faculty will embed quality/regulatory into their curriculum. Several colleges have requested that most or all of their Biotechnology faculty are CQIA-trained, which will expose their students to quality/regulatory in more Biotechnology classes and reinforce those skills. Since most faculty have not worked in an industry setting, industry externships provide faculty with a unique opportunity to learn exactly what's expected of the students they are training. The experience helps faculty build those expectations into their curriculum so that their students are better prepared. The funds will also provide support that enables students to do supply chain activities, those activities in which the students manufacture products such as reagents and plates under quality/regulatory guidelines that are in turn used in other Biotechnology and Biology labs. Those products also get distributed to local high schools where they are used in Biotechnology labs by hundreds of high school students at huge cost-savings to the high schools in addition to exposing high school students to Biotechnology opportunities at the local Community Colleges. This project is expected to improve enrollment, completion of certificates, and employment in a job closely related to their field of study. The high industry demand for entry-level employees with quality/regulatory skills means that more students will enroll in and complete Biotech programs that will qualify them for good-paying industry jobs.

Task Force Recommendations**Career Pathway**

3. Develop and broadly publicize industry-informed career pathways that prepare students for jobs needed within the regional labor market.

Workplan**Risks**

The biggest risk that might prevent the successful completion of this project is that once the funds are sent to the colleges, there is no mechanism in place for accountability. Eligibility for a potential second round of ISPIC funding could be used for accountability in this first year of ISPIC funding.

ACTIVITY TIMEFRAME: Year 1

MAJOR ACTIVITIES: Activities include instructor training in CQIA and GMP with certification in CQIA, curriculum development to embed in existing courses or for stand alone courses, industry externships, and implementation of supply chain operations in which students manufacture reagents, supplies, and kits under quality and regulatory conditions that will in turn get used by hundreds of students in college biology labs and high school biotechnology labs.

Subject: Match Dollars to Promote Industry Sector Projects-in-Common
Year 2 of the Strong Workforce Program

INDUSTRY SECTOR PROJECTS IN COMMON (ISPIC)

The CCCCCO Workforce and Economic Development Division is making match funds available to encourage you to invest Strong Workforce dollars* in projects that adopt or adopt/adapt Industry Sector Projects-in-Common (ISPIC). ISPIC projects make it easier for colleges (or regional consortia of colleges) to deliver 'more and better career education' in areas of labor market demand. This suggests the sub-recommendations of the Strong Workforce Task Force, "Develop and broadly publicize industry-informed career pathways that prepare students for jobs needed within the regional labor market".

Our [network of Sector Navigators](#) will administer the rollout of these match funds, with support from their Deputy Sector Navigators. Faculty and colleges are encouraged to contact the pertinent Sector Navigator to learn more.

Each Sector Navigator will have up to \$400,000 in matching funds to deploy and drive workforce outcomes found in LaunchBoard.

**Other funding sources are eligible for the match, such as Adult Education Block Grant funds.*

HOW DO I SEEK OUT THE MATCH?

EXHIBIT B

Begin by reviewing our [ISPIC Index](#) for curated opportunities that you may wish to explore in order to drive student outcomes listed in your LaunchBoard. The ISPIC Index projects have been identified by Sector Navigators (SN) and Deputy Sector Navigators (DSN).

Next, reach out to the pertinent [Sector Navigator](#) to express your interest in adopting or adopting/adapting projects, to better understand how the process will roll out, and to know how commitments of matches can be obtained. Sector Navigators were provided with [guidance on Industry Sector Projects in Common](#) on October 19, 2017.

Concurrently, build support by your college's CIO and Career Education (CTE) Dean to pledge Local Shares of your college's Strong Workforce dollars against the project. Regional Share can also be used.

APPENDIX A

Chancellor's Office, California Community Colleges

GRANT AGREEMENT

ARTICLE I

The Workforce and Economic Development Program CTE Data Unlocked Grant

Program-Specific Legal Terms and Conditions (Effective January 15, 2016)

1. Cost and Payments

In consideration of satisfactory performance of the services described in the Grantee's application, the California Community Colleges, Chancellor's Office (hereinafter Chancellor's Office) agrees to pay the Grantee a total amount not to exceed the "Grant Funds" amount stated on the fully executed Grant Agreement face sheet, which shall be used as set forth in the Application Budget.

Payment shall be made as follows:

- An advance payment of 40% of the total amount of this Grant Agreement will be paid as soon as feasible after the Grant Agreement is fully executed.
- Grantee may submit request for progress payments at the time that year-to-date quarterly and expenditures reports are submitted pursuant to section 4 of this Article. Payment will be made after review and approval of the quarterly reports by the Chancellor's Office. Progress payment(s) can only be made up to 90% of the total grant amount as the last 10% is withheld pending satisfactory performance and submittal of final performance and expenditure reports.
- A final payment will be calculated based on the Final Performance and Expenditure Reports due by July 31, 2018. If the total expenditure of funds by that date is less than the advance payment, the Chancellor's Office may invoice the Grantee for the excess amount.

Grantee agrees to expend matching funds at least equal to the match identified on the face sheet of this Grant Agreement. Payments shall be based on project costs reduced to the extent of required matching funds.

2. Budget Changes

- Grant recipient(s) may make changes to any budget category amounts without the approval of the Project Monitor so long as budget categories are not added or deleted, the total dollar amount of the Grant Agreement is not affected, and the outcomes of the Grant Agreement will not be materially affected.
- Adding or deleting budget categories are subject to the prior approval of the Project Monitor. Prior approval for these additions and/or deletions is made through the Chancellor's Office on-line quarterly reporting system. Once the requested change is approved, the affected quarterly budget will be updated electronically.
- Grant amendments are required for budget changes when there are changes in the total dollar amount of the Grant Agreement and/or the outcome of the Grant Agreement is materially affected.

3. Application Amendment Requests

If circumstances occur during the performance period that would materially affect outcomes(s) of the approved Grant Application, the grant recipient is required to contact the Project Monitor for further instructions.

ARTICLE II

Standard Legal Terms and Conditions

(Revision 5/15/14)

1. Work to be Performed

The Grantee shall complete the tasks described in the Grantee's application and funds shall be expended in compliance with the requirements for the funding source and category referenced in the Grant Agreement face sheet.

Grantee may request modifications to the work to be performed. All such requests must be submitted in writing to the Project Monitor prior to the modification being made. The Project Monitor may require that a Grant Amendment be processed, if the monitor determines that the change would materially affect the project outcomes or the term of this Grant Agreement.

Modifications or amendments to the Work to be Performed provisions of this Agreement involving an extension of time are subject to applicable program limitations. For grants funded under the Carl D. Perkins Career and Technical Education Improvement Act of 2006, extensions of time are not allowed beyond June 30th of the year in which the funds were awarded. For other programs, no modification or amendment may permit expenditures to be made after June 30th of the second year following the period for which the funds were appropriated. Any modification or amendment permitting funds to be spent beyond the year of appropriation shall ensure that Grantee does not receive funding for the same expense from more than one fiscal year.

2. Amendments

An amendment of this Grant Agreement is required when the Grantee wishes to extend the completion date or materially change the work to be performed or the budget (see Article I section 2 and Article II section 1). The request must be made on the appropriate form provided by the Chancellor's Office and must be submitted to the Project Monitor prior to making the desired alteration in the performance or expenditures under the Grant Agreement. Requests for amendments should be received 60 days before the end of the performance period.

Amendments involving an extension of time are subject to applicable program limitations. For grants funded under the Carl D. Perkins Career and Technical Education Improvement Act of 2006, extensions of time are not allowed beyond June 30th of the year in which the funds were awarded. For other programs, no amendment may permit expenditures to be made after June 30th of the second year following the period for which the funds were appropriated. Any amendment permitting funds to be spent beyond

Article II-Standard Legal Terms and Conditions

the year of appropriation shall ensure that Grantee does not receive funding for the same expense from more than one fiscal year.

3. Unenforceable Provision

In the event that any provision of this Grant Agreement is unenforceable or held to be unenforceable, then the parties agree that all other provisions of this Grant Agreement remain in full force and effect and shall not be affected thereby.

4. Dispute

In the event of a dispute, Grantee agrees to file a "Notice of Dispute" with the Chancellor's Office, within ten (10) days of discovery of the problem. Within ten (10) days, the Chancellor or his or her designee shall meet with the Grantee, the Vice Chancellor for the division awarding the Grant Agreement, and the Project Monitor for purposes of resolving the dispute. The decision of the Chancellor shall be final.

In the event of a dispute, the language contained within this Grant Agreement shall prevail over any other language including that of the grant proposal.

Grantee shall continue with the responsibilities under this Grant Agreement during any dispute.

5. Notice

Either party may give notice to the other party by sending certified mail properly addressed, postage fully prepaid to the other party's business address. Notices to be sent to the Chancellor's Office shall be addressed to the Project Monitor at California Community Colleges, Chancellor's Office, 1102 Q Street, Suite 4554, Sacramento, CA 95811-6539. Notices to be sent to the Grantee shall be addressed to the Project Director at the Grantee's address as specified on the face sheet of this Grant Agreement. Such notice shall be effective when received, as indicated by post office records, or if deemed undeliverable by the post office, such notice shall be postponed 24 hours for each such intervening day.

6. Interpretation

In the interpretation of this Grant Agreement, any inconsistencies between the terms hereof and the Exhibits shall be resolved in favor of the terms hereof.

7. Project Director and Key Personnel

The Project Director is designated by the Grantee on the face sheet of the Grant Agreement, and the key personnel are identified in the application or proposal. The Grantee may change the Project Director or other key personnel, but the Grantee shall immediately notify the Project Monitor in writing of any such changes.

8. Project Monitor

The Project Monitor is designated by the Chancellor's Office on the face sheet of the Grant Agreement. The Project Monitor is responsible for overseeing the project and any questions or problems relating to the project should be directed to the Project Monitor. If necessary, the Chancellor's Office may change the Project Monitor by written notice sent to the Grantee.

9. Budget Concerns

- a. It is mutually understood between the parties that this Grant Agreement may have been written before ascertaining the availability of state or federal funds, for the mutual benefit of both parties in order to avoid program and fiscal delays which would occur if this Grant Agreement were executed after the determination was made.
- b. It is mutually agreed that if the state or federal budget for the current year and/or any subsequent years covered under this Grant Agreement does not appropriate sufficient funds for the program, this Grant Agreement shall have no force and effect. In this event, the Chancellor's Office shall have no liability to pay any funds whatsoever to Grantee or to furnish any consideration under this Grant Agreement and Grantee shall not be obligated to perform any provisions of this Grant Agreement.
- c. Grantee shall inform any subcontractors and subgrantees that any work performed prior to approval of the state or federal budget, as applicable, will be rendered on a voluntary basis, and shall not be compensated unless and until funding is authorized.
- d. In no event may Grantee use Grant funds to pay any individual or organization for the work associated with preparing the Grant application. For breach or violation of this prohibition, the Chancellor's Office shall, in addition to other remedies provided by law, have the right to annul this Grant Agreement without liability, paying only for the value of the work actually performed, or otherwise recover the full amount of such commission, percentage, brokerage, or contingent fee.
- e. In addition, this Grant Agreement is subject to any additional restrictions, funding reductions, limitations or conditions enacted in the state or federal budget, any amendments thereto, or in the laws and Executive Orders that may affect the provisions, term, or funding of this Grant Agreement in any manner. The parties hereby agree that the Chancellor's Office will notify Grantee of any such changes affecting the terms of this Grant Agreement, but need not execute an amendment to modify the Grant Agreement.

10. Assignment

Grantee may not transfer by assignment or novation the performance of this Grant Agreement or any part thereof except with the prior written approval of the Project Monitor. Nor may Grantee, without the prior written consent of the Project Monitor, assign any other right that Grantee may have under this Grant Agreement. Each assignment that is approved by the Project Monitor shall contain a provision prohibiting further assignments to any third or subsequent tier assignee without additional written approval by the Project Monitor. The Project Monitor's consent to one or more such assignments or novations shall not constitute a waiver or diminution of the absolute power to approve each and every subsequent assignment or novation.

11. Subcontracts or Subgrants

- a. Grantee agrees to obtain the written approval of the Project Monitor prior to the selection of subcontractors or subgrantees to perform services under this Grant Agreement, based upon a written request indicating compliance with the provisions set forth below. Except where prohibited by the Standards of Conduct provisions set forth in section 15 of this Article, subcontractors or subgrantees specifically identified in this Grant Agreement or the Exhibits attached hereto and which are secured in accordance with applicable legal requirements and the provisions set forth below are deemed approved upon execution of this Grant Agreement.
- b. In any event, if the Grantee wishes to enter into a subcontract or subgrant agreement for performance of any part of the activities under this Grant Agreement, Grantee shall disclose the intended purpose and amount of the subcontracting, identify the proposed subcontractor or subgrantee, and certify that the subcontractor or subgrantee was selected according to locally applicable competitive bidding processes which are reasonably calculated to ensure that cost shall be given substantial weight in the selection process, and that the selected subcontractor or subgrantee is the best qualified party available to provide the required services. Upon request, Grantee shall furnish evidence of compliance with this provision to the Project Monitor. Grantee shall immediately notify the Project Monitor in the event that any subcontract or subgrant is terminated.
- c. All subcontracts or subgrants shall contain a provision prohibiting any third or subsequent tier subcontracts or subgrants without additional written approval by the Project Monitor.
- d. The Project Monitor's consent to one or more subcontracts or subgrants shall not constitute a waiver or diminution of the absolute power to approve each and every subsequent subcontract or subgrant.

Article II-Standard Legal Terms and Conditions

- e. Upon request, Grantee shall furnish any additional evidence the Project Monitor may deem appropriate concerning the competitive bidding procedures used or any other matter related to compliance with paragraphs (a) or (b).
- f. Grantee shall not enter into any subgrant or subcontract of the types described below and any such agreement which may be executed is null and void and of no force or effect.
 - 1. A former state employee (including a Chancellor's Office employee, or a district employee who worked for the Chancellor's Office on an Interjurisdictional Exchange (IJE)) cannot enter into a subcontract or subgrant under this Grant Agreement with the Grantee if that employee was engaged in the negotiations, transactions, planning, arrangements or any part of the decision-making process relevant to this Grant Agreement while employed by the state. (Gov. Code, §§ 1090, et seq., 87100, and 87400 et seq.; Cal.Code Regs. tit. 5, §§ 18741.1 and 18747.)
 - 2. A current state employee (including a current Chancellor's Office employee or district employee working for the Chancellor's Office on an Interjurisdictional Exchange (IJE)) cannot enter into a subcontract or subgrant with the Grantee, with the exception of rank-and-file employees of the California State University and the University of California. (Pub. Contr. Code, § 10410.)
 - 3. The spouse or a member of the immediate family of a current Chancellor's Office employee (including a current Chancellor's Office employee or district employee working for the Chancellor's Office on an Interjurisdictional Exchange (IJE)) may not enter into a subcontract or subgrant with the Grantee if the Chancellor's Office employee or person on an IJE was engaged in the negotiations, transactions, planning, arrangements or any part of the decision-making process relevant to this Grant Agreement, or the subcontract or subgrant, or had any influence whatsoever in the making of this Grant Agreement, or the subcontract or subgrant. (Gov. Code, §§ 1090, et seq.; and 87100.)
- g. Nothing contained in this Grant Agreement or otherwise, shall create any contractual relationship between the Chancellor's Office and any subcontractors or subgrantees, and no subcontract or subgrant shall relieve Grantee of its responsibilities and obligations hereunder. Grantee agrees to be as fully responsible to the Chancellor's Office for the acts and omissions of its subcontractors, subgrantees, and of persons either directly or indirectly employed by them, as it is for the acts and omissions of persons directly employed by Grantee. Grantee's obligation to pay its subcontractors and subgrantees is independent from the obligation of the Chancellor's Office to make payments to Grantee. As a result, the Chancellor's Office shall have no obligation to pay or enforce the payment of any moneys to any subcontractor.

12. Audit

Grantee agrees that the Chancellor's Office, the Bureau of State Audits, any other appropriate state or federal oversight agency, or their designated representative(s), shall have the right to review and to copy any records and supporting documentation pertaining to the performance of this Grant Agreement. Grantee agrees to maintain such records for possible audit for a minimum of three (3) years after final payment or until any audit findings have been resolved, unless a longer period of records retention is stipulated. Grantee agrees to allow the auditor(s) access to such records during normal business hours and to allow interviews of any employees who might reasonably have information related to such records. Further, Grantee agrees to include a similar right of the Chancellor's Office, the Bureau of State Audits, any other appropriate state or federal oversight agency, or their designated representative(s) to audit records and interview staff in any subcontract or subgrant related to performance of this Grant Agreement.

13. Products and Deliverables

- a. Each deliverable to be provided under this Grant Agreement shall be submitted to and approved by the Project Monitor. All products, documents and published materials, including multimedia presentations, shall be approved by the Project Monitor prior to distribution.
- b. Any document or written report prepared, in whole or in part by Grantee, or its subcontractors or subgrantees, shall contain the Grant number and dollar amount of the Grant and subcontracts or subgrants relating to the preparation of such document or written report. The Grant and subcontract or subgrant numbers and dollar amounts shall be contained in a separate section of such document or written report. (Gov. Code, § 7550(a).)
- c. When multiple documents or written reports are the subject or product of the Grant Agreement, the disclosure section must also contain a statement indicating that the total Grant amount represents compensation for multiple documents or written reports. (Gov. Code, § 7550(b).)
- d. All products resulting from this Grant Agreement or its subcontracts in whole or in part shall reference the California Community Colleges, Chancellor's Office and the specific funding source.
- e. All references to the project shall include the phrase, "funded in part by the California Community Colleges, Chancellor's Office."

14. Travel

For travel necessary to the performance of this Grant Agreement, Grantee travel and other expense reimbursement claims shall be governed by the travel policy and procedures adopted by the Grantee's governing board. Travel and other expenses shall be limited to those necessary for the performance of this Grant Agreement. For grants involving federal funds, any out-of-state travel must be approved in advance by the Project Monitor.

Grant funds may be used to pay for travel for Chancellor's Office staff provided that the travel is related to the purposes of the Grant Agreement, the travel is necessary to allow Chancellor's Office staff to provide services or technical assistance beyond the scope of normal Grant monitoring, the request is made by the Grantee without duress from Chancellor's Office staff, Grantee does not seek or receive any favorable treatment in exchange for paying for travel, travel is arranged and paid for through ordinary Chancellor's Office processes, and the Grant funds are used to reimburse those costs using Accounting Form RT-01 Request for Services/Agreement to Pay Travel Expenses.

15. Standards of Conduct

Grantee hereby assures that, in administering this Grant Agreement, it will comply with the standards of conduct hereinafter set out, as well as the applicable state laws concerning conflicts of interests, in order to maintain the integrity of this Grant Agreement and to avoid any potential conflict of interests in its administration.

- a. Every reasonable course of action will be taken by the Grantee in order to maintain the integrity of this expenditure of public funds and to avoid any favoritism or questionable or improper conduct. The Grant Agreement will be administered in an impartial manner, free from personal, financial, or political gain. The Grantee, and its officers and employees, in administering the Grant Agreement, will avoid situations which give rise to a suggestion that any decision was influenced by prejudice, bias, special interest, or personal gain.
- b. **Conducting Business with Relatives.** No relative by blood, adoption, or marriage of any officer or employee of the Grantee, or of any member of its governing board, will receive favorable treatment in the award of subcontracts or subgrants or in educational or employment opportunities funded by this Grant Agreement.
- c. **Conducting Business Involving Close Personal Friends and Associates.** In administering the Grant Agreement, officers and employees of the Grantee will exercise due diligence to avoid situations which may give rise to an assertion that favorable treatment is being granted to friends and associates.

Article II-Standard Legal Terms and Conditions

- d. Avoidance of Conflicts of Economic Interests.
 - 1. Grantee shall take all reasonable steps to ensure that its officers and employees, and members of its governing board, will avoid any actual or potential conflicts of interests, and that no officer, employee, or board member who exercises any functions or responsibilities in connection with this Grant Agreement shall have any personal financial interest or benefit which either directly or indirectly arises from this Grant Agreement. The term "financial interest" shall include the financial interest of the officer, employee, or board member's spouse or dependent child.
 - 2. Grantee shall establish safeguards to prohibit officers, employees or board members from using their positions for a purpose which could result in private gain, or give the appearance of being motivated for private gain for themselves or others, particularly those with whom they have family, business, or other ties.
 - 3. An officer or employee of Grantee, an elected official in the area, or a member of the governing board, may not solicit or accept money or any other consideration from a third person for the performance of any act reimbursed, in whole or in part, by Grantee or the Chancellor's Office. Supplies, materials, equipment, or services purchased with Grant funds will be used solely for purposes allowed under this Grant Agreement.
 - 4. The governing board may not authorize the award of any subcontract or subgrant funded by this Grant Agreement, if that contract, subcontract or subgrant is for the provision of services or goods by any board member, or by any person or entity which is a source of income to a board member.
- e. In the interest of avoiding conflicts of interests involving friends or associates of Chancellor's Office employees, in administering this Grant Agreement, officers and employees of the Grantee will exercise due diligence to avoid situations which may give rise to an assertion that favorable treatment is being granted to friends and associates of Chancellor's Office employees.

16. Statewide or Regional Projects

If this Grant involves provision of coordination, technical assistance, or other services for the California Community College system or for a particular region or group of colleges, the following requirements shall apply:

- a. Grantee agrees to consult regularly with the Project Monitor and representatives of the colleges to be served and to give every reasonable consideration to their views in the conduct of the project.

Article II-Standard Legal Terms and Conditions

- b. Grantee shall require all employees, consultants, subcontractors and subgrantees to disclose any employment or contractual relationships they may have with other colleges being served under a statewide or regional grant. Such relationships are prohibited and shall be promptly terminated unless, after being fully informed of the circumstances, the Project Monitor determines that the services being provided to the other college by the employee, consultant, or contractor are above and beyond or unrelated to those provided under this Grant.
- c. In the event this Grant Agreement is terminated as provided herein, the Chancellor's Office shall be entitled to (1) pursue the same remedies against Grantee as it could pursue in the event of the breach of the Grant Agreement by the Grantee, and (2) exemplary damages in an amount which shall be not less than three nor more than ten times the cost incurred by Grantee in providing any such gratuities to any such officer or employee, as a penalty in addition to any other damages to which it may be entitled by law.

The rights and remedies provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Grant Agreement.

23. Waiver

No waiver of any breach of this Grant Agreement shall be held to be a waiver of any other or subsequent breach. All remedies afforded in this Grant Agreement shall be taken and construed as cumulative; that is, in addition to every other remedy provided therein or by law. The failure of the Chancellor's Office to enforce at any time any of the provisions of this Grant Agreement, or to require at any time performance by Grantee of any of the provisions thereof, shall in no way be construed to be a waiver of such provisions nor in any way affect the validity of this Grant Agreement or any part thereof or the right of Chancellor's Office to thereafter enforce each and every such provision.

Any informational, advertising, or promotional materials regarding such programs may not include any statements to the effect that a program is for, or designed for students of a particular race, color, national origin, ethnicity or gender. In the event that mentoring or counseling services are provided with funding provided by this Grant Agreement, students may not be paired with mentors or counselors based solely upon the race, color, national origin, ethnicity or gender of the students, mentors, or counselors. The Chancellor's Office may, by written approval of the Chancellor, grant an exception to the requirements of this paragraph where Grantee provides documentation clearly demonstrating that designing a program for a particular group of students is justified under applicable legal standards as a remedy for past discrimination.
